# **Blumira's Free SIEM**

#### Sign up for free, no credit card or sales conversation required.

Get easy, effective security your team can actually use to defend against breaches and ransomware, while meeting compliance and cyber insurance requirements. Blumira's SIEM detects threats earlier for faster threat response and better security outcomes.

### **Detect & Respond to Cloud Threats**

Blumira's Free SIEM detects and helps you respond to cloud security threats, including initial access, account takeovers, suspicious activity, and other techniques used in business email compromise (BEC), ransomware and other malware campaigns.

#### With our Free SIEM edition, you'll get:

- Unlimited users and data -- choose up to 3 cloud integrations (from Google Workspace, Google Cloud, Microsoft 365, Duo Security, SentinelOne, Cisco Umbrella, Mimecast, Webroot, Azure, Sophos, Jumpcloud, OneLogin, 1Password, CrowdStrike and MS Defender for Cloud Apps)
- Easy cloud SIEM setup in minutes with Cloud Connectors
- Detections automatically activated, fine-tuned for noise
- Summary dashboard of key findings & basic reports
- Playbooks to guide you through response steps
- 14 days of log data retention (upgrade to paid for 30 days or one year)

## Why Free?

#### Automate Security Tasks

We do all the heavy lifting for your team to save them time, including parsing, creating native third-party integrations, and testing and tuning detection rules to reduce noisy alerts. Spend less than 15 minutes a day on average managing your security with Blumira.

#### Faster Time to Security

Our unique approach to detections notifies you of threats other security tools may miss, sending you real-time alerts in under a minute of initial detection to help you respond to threats faster than ever.

#### Security Coverage For 3 Cloud Integrations

Choose from up to 3 easy-tosetup cloud integrations.

For broader coverage, expand to cover both on-prem, cloud, and remote endpoints with Blumira Agent. Get full 24/7 support from Blumira's Security Operations team for onboarding, guided response and more!\*

## **Findings: Coverage of Real Cloud Threats**

Blumira leverages threat intelligence and behavioral analytics to detect attack patterns. We do the heavy lifting for you, automatically activating detection rules to identify:

#### **Detect Attacker Activity**

- Privilege escalation of Exchange admin accounts
- Creation of forwarding & redirect rules
- Suspicious inbox rule creation
- When files are shared with personal email addresses
- The mass download of files
- Whenever an email send limit is exceeded to protect against spam campaigns

#### Ransomware & Malware

- Ransomware activity (high rate of file uploads or deletion activity could indicate an adverse encryption process)
- Malware campaigns detected in SharePoint and OneDrive
- Malware campaigns detected after delivery
- Malware auto-purge failed due to user configuration (Microsoft's email protection features disabled)

$\mathcal{C}$	2
C	$\mathcal{Y}$

#### **Unusual Behavior**

- Any activity from anonymous or suspicious IP addresses
- Activity from infrequent countries or terminated users
- Any unusual external file activity
- Increases in phishing emails or ISPs (internet service providers) for an OAuth application
- Any suspicious email sending patterns detected

#### **User & Access Security**

- Multi-factor authentication (MFA) is disabled for an Azure Active Directory (AD) user
- Anomalous access attempts or the creation or deletion of an application password
- Anytime a user clicks on a malicious URL or is restricted from sending an email
- Any impossible travel activity, indicating unauthorized access
- Multiple failed user logon attempts

# Blumira

#### DATA SHEET

# Deeper Visibility Into Microsoft 365

With Blumira's Microsoft 365 reports, your organization can track security trends over time to learn about your attack surface. *No knowledge of complex query languages required to run a report.* 

Here are a few examples of pre-built reports you get for free:

- Disabled Azure AD accounts, deleted contacts and any group changes
- Password changes or resets, and user or device added
- Failed user login attempts, overall login reports and logins outside of U.S., Canada and Mexico
- Impossible travel activity and successful logins outside of the U.S.
- **Delegation of mailbox permissions,** mail items accessed (other than the owner) and emails forwarded to new domains
- Files previewed or accessed SharePoint

Upgrade to a paid edition for advanced reporting features:

- Show immediate security value to your manager or CEO with **Executive Summaries**, generated monthly & quarterly
- Schedule reports to send automatically to your team; drill down deeper into report details for investigation and compliance
- Get at-a-glance Security, Manager and Responder dashboards
- Prove your compliance easily to auditors with pre-built compliance reports, such as NIST, CMMC, HIPAA, PCI DSS & more

Summary Dashboard of Free SIEM

Free SIEM blumira.com/free

#### **Benefits of Blumira**:

- Faster time to security deploy in minutes, 5x faster than industry average
- Save your team's time automate manual triage and response
- Lower TCO transparent, all-in-one platform priced per seat (not by data ingestion)
- Access to security experts - responsive support included; no need for inhouse analysts

"I turned on the free version of Blumira and put it into our Microsoft 365 environment, and immediately we started getting information within 10 minutes that revealed we had malicious logins from other IPs outside the United States; credentials being changed."

- Mike Amado, IT Program Admin, City of Murrieta

## Security Made Accessible to All

"I would recommend Blumira -- it makes our daily job so much easier and it's simple to set up security for our customers. We only receive alerts that we need to act upon."

- Adam Thomas, Director of Cybersecurity, Path Forward IT (MSP)

"SIEMs have been unreachable for small or medium-sized companies for far too long and we are glad to say that with Blumira, that's not the case anymore."

- David S. CISO
