Use these pre-written social media posts to share the news of a free cloud SIEM for Microsoft 365 with your networks.

---

71% of attacks targeted Microsoft 365; making it the top most commonly exploited application worldwide.

SMBs are often left wondering how they can protect against attacks with limited resources and time – now they can with Blumira's Free edition for Microsoft 365.

For unlimited users and data, you get:

- An easy-to-deploy cloud SIEM that any IT admin can set up in minutes
- Automatic detection rules that identify critical Microsoft 365 threats
- Instructions on how to respond to help contain threats, built into every finding
- Security reports to help you track unusual activity over time, with 7 days of log data retention

Contact us to get a free edition - no special licensing required. Learn more about what you get with Microsoft 365 security monitoring:

---

Did you know that 85% of companies that use [Microsoft 365](#) are small to medium businesses (SMBs)? ([Thexyz Inc](#)). Yet many SMBs have fewer resources to defend against cyber threats, so affordable security for M365 is especially crucial.

With Blumira's free SIEM, you can finally detect and respond to Microsoft 365 threats without special licensing or security staff. (And no need to enter in credit card info or even talk to a salesperson 🙌 )

It's easy to get set up in minutes! Contact us to get a free account today.

“

We're excited to launch a detection and response solution that prospective customers can try out on their own, in their own time. **We've eliminated the barriers to entry** that typically keep advanced security out of the hands of organizations with limited resources.
