Blumira

Blumira's Detection & Response

HELP HEALTHCARE ORGANIZATIONS EASILY MEET HIPAA COMPLIANCE

Blumira's cloud SIEM platform helps organizations easily meet HIPAA compliance monitoring and security controls to protect the confidentiality of sensitive patient health information. These guidelines illustrate how Blumira helps address the needs of HIPAA Phase 2:

Section 164.308(a)(1)(ii)(D)

Information system activity review (Required). Implement procedures to regularly review records of information system activity, such as audit logs, access reports, and security incident tracking reports.

How Blumira Helps: Blumira's platform automates the review of records of information system activity to detect and notify organizations of anomalous activity.

Section 164.308(a)(5)(ii)(C)

Log-in monitoring (Addressable). Procedures for monitoring log-in attempts and reporting discrepancies.

How Blumira Helps: Blumira's platform monitors user activity, including login attempts, and provides notifications and reports of any unusual activity in a timely manner to help organizations respond faster to potential security incidents.

Section 164.312(b)

Audit controls. Implement hardware, software, and/or procedural mechanisms that record and examine activity in information systems that contain or use electronic protected health information.

How Blumira Helps: Blumira's cloud platform collects records (logs) of systems and analyzes the logs for any anomalous or suspicious activity.

Section 164.316(b)(2)(i)

Retain the documentation required by paragraph (b)(1) of this section for 6 years from the date of its creation or the date when it last was in effect, whichever is later.

How Blumira Helps: Blumira's SIEM provides the ability to provide records of historical data, immediately available for at least one year and longer periods of time.

Blumira

HOW DO WE DO THINGS DIFFERENTLY?

Meet compliance controls, save time on security tasks, focus on real threats and protect against a breach faster than ever -- with Blumira.

UNIFY YOUR TOOLS

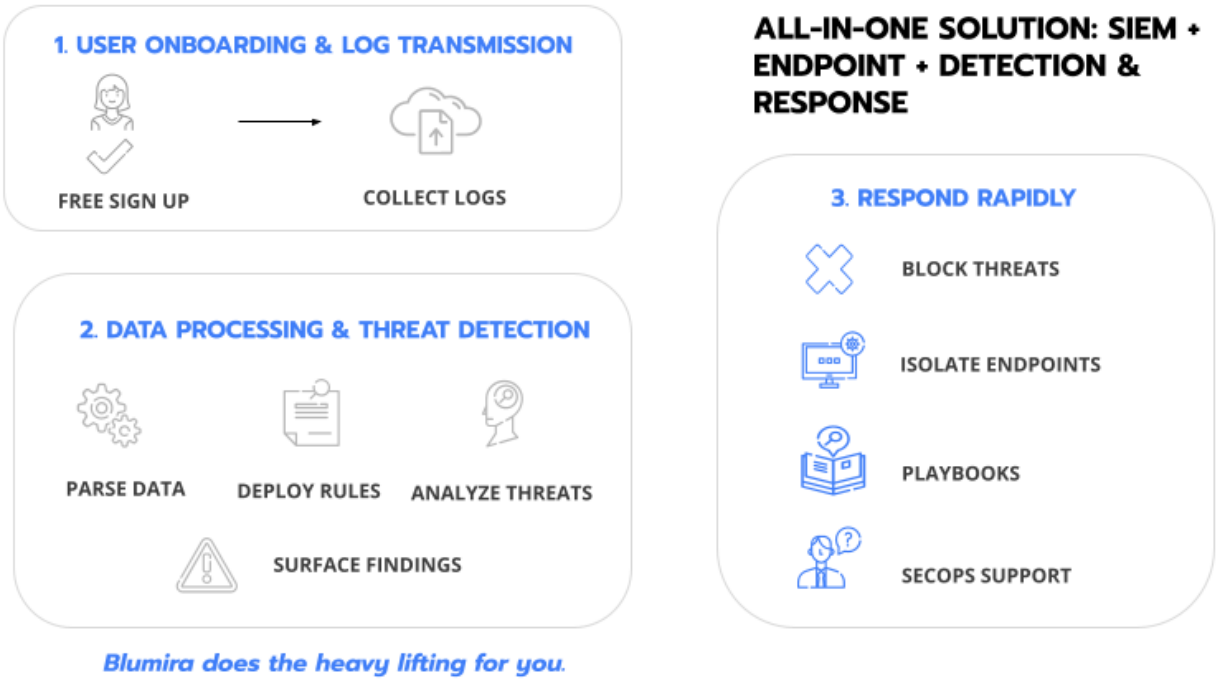
Our platform unifies EDR capabilities, SIEM logging, detection & response to identify threats other security tools may miss, sending you alerts in under a minute of detection to help you respond to threats faster than ever.

AUTOMATE MANUAL TASKS

We do all the heavy lifting for your team to save them time -- parsing, creating native third-party integrations, testing and tuning detection rules to reduce noisy alerts. Our SecOps team is available 24/7 for critical priority issues.

EASILY MEET COMPLIANCE

With at least a year of data retention and deployment that takes minutes to hours, we help you meet cyber insurance and compliance easily and quickly with the team you have today.



Blumira does the heavy lifting for you.

My goal was to bring automation into the community -- now when a security event happens, I'm alerted right away by phone. To be able to pay for a service and have pretty much a SOC team behind you to support you — it definitely gives me a good night's sleep.
