Blumira

Advanced Detection, Analysis & Guided Response

SIEM Made Easy For MSPs

Time to security is more critical than ever to quickly detect and contain threats. Blumira's platform and detection engineers enable your existing helpdesk to respond to threats faster.

Simplify & Automate Threat Protection

No hardware to deploy. No security expertise necessary. With Blumira's platform, you can get up and running in minutes, not days and weeks — using your existing team and infrastructure.

Detection

Monitor and detect real threats
- Get meaningful findings on real threats to reduce alert fatigue
- Easy-to-understand remediation instructions
- Coverage across on-premises and cloud; track trends with security reports

Response

Enable your team to quickly respond
- Block known threats with automated responses
- Easily remediate with playbooks for every finding
- Rely on Blumira's security team for further assistance
Expertise

Gain access to security expertise
- Get security advice from Blumira's responsive security team
- Get help with onboarding, deployment, integrations and rule management
- Get advanced support for incident response, triage and investigation

Benefits of Blumira:

▶ **MSP-friendly** - Free for internal use licensing, multi-tenancy, monthly billing

▶ **Replace your SOC** (security operations center) - automate manual triage and response

▶ **Lower TCO** (total cost of ownership) - all-in-one platform priced per user (not data or endpoints)

▶ **Access to security experts** - responsive support included; acts as an extension of your team

Easy, Fast Security

"Been using Blumira for over a year now and I'm in love. Absolutely love the detection workflow and the recommendations they provide when working through them. Highly recommend."

-- Jack Wagner, OIT, LLC

3 - Steps to Partner & Prepare for Compliance:

01 Protect Yourself For Free
Blumira's MSP Program provides free-for-internal-use NFR licensing

02 Protect Your Clients For Free
Add all clients into our Free SIEM to protect M365, S1, Duo, and more to help you sell the value of a SIEM!

03 Be Prepared Before It's Mandatory
Use your NFR to standardize Blumira into your stack so when the mandates comes, you'll be ready to help clients meet compliance

Advanced Threat Detection

"Alerts are actionable and of real interest, making us aware of risks that our current SIEM solutions were missing."

-- John Snyder, CEO, Net Friends
